

Guitar compact effect series

UNI-COMP

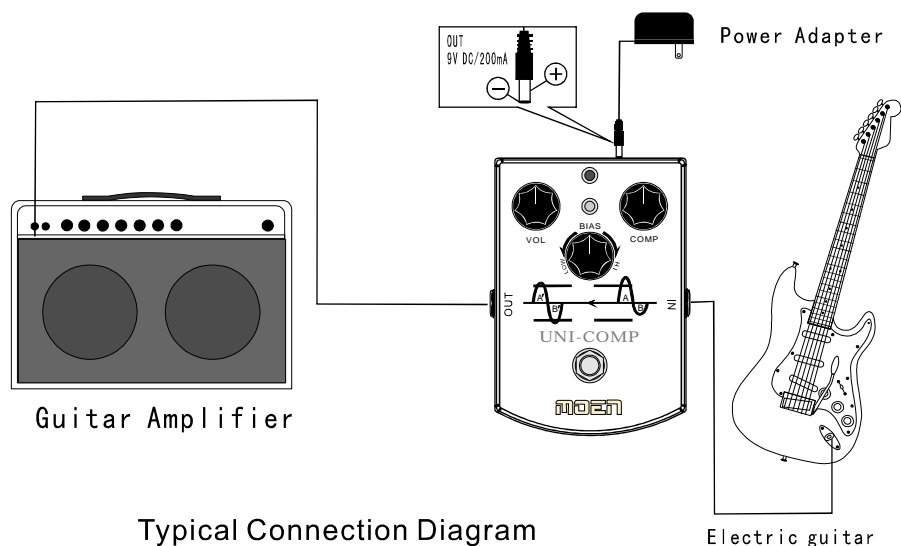

Features:

- Ultrafast response
- Extremely low noise
- Twin filter avoids low-freq modulation
- Flexible EQ knob
- BIAS LED indicates depth of compression
- True bypass stomp switch, no signal loss

BEIJING MOEN TECHNOLOGY CO., LTD.

- 1, VOL**
-Output volume knob
- 2, DC JACK**
-Power input jack, 9V DC positive ground
- 3, COMP**
-Compression depth knob
- 4, BIAS**
-Frequency response knob

Typical Connection Diagram

- 5, IN**
-Guitar signal input
- 6, Enclosure**
-Solid die-cast enclosure
- 7, Switch**
-Metal stomp switch
- 8, OUT**
-Pedal signal Output
- 9, Dynamic Depth Indicator**
-The LED indicates the compression depth dynamically
- 10, General indicator**
-The LED is on when the pedal is enabled

Note: The power will be off when the input plug is disconnected.
